## × Freeform – A.T. Home EP

Freeform invites you to share his slide collection. Some traces gathered during an "audio-tourism" travel in China and Vietnam. Fragments of emotions, furtive images, moments of jet lag distorted perceptions and an abundance of memories subjectively "stolen" from the daily Asian life. A new 3 tracks 12" that proudly announces the imminent release of a new full-length album filled with furious breakbeats built around electronic devices and field recordings. Gamelan fighting with beat-boxes, flutes and cymbals defying basslines and sampler. This is a step into a new form of intelligent "techno" and cutting-edge "dance" music. Enjoy an original trippy trance effect with this blasting encounter of traditional Zen spirit and kicking beats, with Freeform as the master of ceremony. These tracks will surely be a welcome addition to your record collection, to be filed somewhere in-between soundtracks, traditional music and the electronic evolutionism sections. This abducting black vinyl UFO will most certainly change your perception of static and astral travels - get your ticket now!
